PROFESSIONAL PROFILE

Systems Analyst with experience in full stack web development (Angular, React, Node.js), automation (Google Apps Script), dashboards with Power BI, and database management (PostgreSQL, MySQL, SQL Server). REST API integration and WordPress CMS.

WORK EXPERIENCE

Full Stack Developer Sep 2024 — Feb 2025
Innevo *Santiago de Chile, remote, Argentina*

I contributed to the development of a dynamic web application using Angular, with a strong focus on user experience and responsive design. I was responsible for building reusable modular components, applying best practices with TypeScript, and ensuring a visually consistent interface through Angular Material.

- Built reusable components following performance and maintainability best practices.
- Integrated Angular Material to ensure a modern and consistent UI.
- Developed complex reactive forms with custom validations.
- Implemented services to manage business logic and shared state between components.
- Connected and integrated external REST APIs using HttpClient, enabling CRUD operations and efficient data visualization.

Freelance Developer Sep 2024 — Present
Twebahora *Buenos Aires, Argentina*

I develop web applications using modern technologies, creating dynamic, scalable, and user-focused solutions.

- Build interactive and responsive interfaces with React and JavaScript, ensuring a smooth and optimized user experience.
- Implement business logic and perform efficient database queries using SQL.
- Customize and maintain websites in WordPress, integrating tailored functionalities and improving accessibility and SEO.

Administrative & IT Analyst Aug 2020 — Apr 2024
Medicina Diagnóstica *Buenos Aires, Argentina*

Responsible for automating administrative processes and optimizing institutional analysis and communication tools. I implemented technological solutions that enhanced operational efficiency and decision-making at the management level.

- Automated payroll processes using Google Apps Script, reducing administrative processing time by 30%.
- Designed and developed interactive dashboards in Power BI for financial and operational analysis, used by management as a key decision-making tool.
- Developed and maintained the institutional website using WordPress and MySQL, improving the online visibility of medical services and strengthening the organization’s digital presence.

TECHNICAL SKILLS

Languages and frameworks: Java, JavaScript, React, Angular, Node.js, Firebase.

Databases: SQL Server, MySQL, Power BI.

CMS and Web: WordPress, HTML, CSS, Sass.

Tools and management: Jira, Trello, GitHub, GitLab, Git, Figma, Teams.

Methodologies: Scrum, Kanban.

English: C1

EDUCATION

Systems Analyst

Universidad Da Vinci

Buenos Aires, Argentina

Aug 2024 — Dec 2027

- Fundamentals of relational database design.
- Logical and physical data modeling (ERD, normalization).
- Advanced SQL: subqueries, joins, functions, and stored procedures.
- Database management and optimization with SQL Server and MySQL.
- Introduction to NoSQL databases and admin tools.

Database Specialization Diploma

National Technological University (UTN)

Buenos Aires, Argentina

Mar 2025 — Jul 2025

- Design, management, and optimization of relational databases.
- Logical and physical data modeling (ERD, normalization).
- Advanced SQL: subqueries, joins, functions, and stored procedures.
- Database optimization with SQL Server, MySQL, and Oracle.
- Introduction to NoSQL databases and admin tools.

Full Stack Developer (PERN)

Henry

Buenos Aires, Argentina

Jan 2023 — Jul 2023

- Intensive full stack training with the PERN stack.
- RESTful API development with Node.js and Express.
- Relational database management with PostgreSQL.
- Dynamic interface development with React.
- Full frontend-backend integration, validations, and user authentication.
- Protected routes and deployment in production environments.
- Agile teamwork (Scrum) and version control with Git.

Advanced React Course

Coderhouse

Buenos Aires, Argentina

Jul 2023 — Nov 2023

- Advanced component design, Promises, and async handling.
- Use of functions like `map` and API integration.
- Hooks, children, and design patterns.
- Routing, navigation, and event handling.
- Global state management with Context, rendering techniques.
- Firebase and Firestore integration.

Web Development with JavaScript, CSS, HTML

Coderhouse

Buenos Aires, Argentina

Jul 2023 — Nov 2023

- Syntax, control structures, functions, objects, and arrays.
- Higher-order functions, DOM manipulation, and event handling.
- Local storage and JSON management.
- Asynchronous programming with Promises/Async.
- AJAX requests using Fetch.
