Profile

Full-stack developer focused on custom web systems and AI integrations. I work as a freelancer under my brand **Kensiweb**: I build platforms with Laravel, Livewire, Node and PostgreSQL, and own deployment and maintenance on my own infrastructure (DigitalOcean, Contabo, Ubuntu). Advanced student of Systems Analysis (Da Vinci). C1 English.

Experience

Freelance Full-Stack Developer — Kensiweb — 2024 — Present

Remote · Buenos Aires, AR

Custom systems, AI integrations and self-owned infrastructure for clients in Argentina and Chile.

Refugio Ilón — AI WhatsApp bot + booking platform — Jul 2025 — Present

Bariloche, AR

- Conversational WhatsApp bot with **Claude** as the backend, integrated with the WhatsApp Cloud API (Meta Business verification).
- Web booking platform with Laravel 12, Livewire 3 and MySQL; online payments via Mercado Pago and an admin panel for rooms and availability.
- Designed to scale into a SaaS for other mountain shelters.

Estudio Froment & Asociados — Full institutional site redesign — Sep 2025 — Oct 2025

Buenos Aires, AR

- Custom frontend with Astro 5 and Tailwind CSS 4; GSAP and Swiper.js for animations and sliders.
- Data modeling for member validation; continuous deployment on Vercel; DNS management through NIC.ar.

Innevo — Angular frontend for a web application — Oct 2024 — Feb 2025

Santiago de Chile, CL (remote)

- Modular components with Angular + Angular Material, REST API integration.
- Strict TypeScript, distributed Argentina–Chile team.

Administrative & IT Analyst — Medicina Diagnóstica — Aug 2020 — Apr 2024

CABA, AR

- Automated payroll with Google Script and built financial dashboards in Power BI.
- Designed and developed the lab's institutional site (WordPress + MySQL).
- Document management, invoicing and support for patients and providers.

Internship · Front-end React Developer — Informental — Nov 2023 — Dec 2023

Mendoza, AR

- Migration of the application from PHP to React, with forms, tabs and charts.
- 15% reduction in load times using React Server Components.

Education

Systems Analyst — Da Vinci University — Sep 2024 — Dec 2027

Buenos Aires, AR

- Relational database design, logical and physical modeling.
- Advanced SQL, administration and optimization with SQL Server and MySQL.
- Introduction to NoSQL databases and administration tools.

Diploma in Databases — UTN (National Technological University) — Jul 2025

Buenos Aires, AR

Full Stack Developer (PERN) — Henry Bootcamp — Jan 2023 — Jul 2023

Buenos Aires, AR

Advanced course in React / TypeScript — Udemy — Jul 2023 — Dec 2023

Certifications

C1 Advanced English — Efset — cert.efset.org/es/iLxjy3

Diploma in Databases — UTN — e-Learning Center — 2025

Full Stack Developer — Henry Bootcamp — 2023
